

Control Systems &
Services

Built Just for You.
Built Right.
Every Time.

Dedicated to the Details

So you're working on a specific project with precise requirements. You need a company that can work closely with you to deliver exactly what you need. You need Murphy's Control Systems and Services.

Our employees have the proven abilities to take your project from concept to design to fabrication and field support. We work with clients to quickly identify critical needs and cost-effective solutions in a wide variety of control systems applications, from basic annunciator shutdown panels to complex PLC-based systems.

We begin the process with the end in mind, utilizing a consultative approach to get a clear picture of your desired end result.

When your system enters production, the expertise continues. We employ a highly-skilled and experienced production force, many with more than 10 years experience in the oil and gas industry.

We also support you after your product is designed and assembled. The same skilled engineers and experienced technicians who designed and built your systems also offer testing to your specifications, on-site startup, complete system documentation, field service and technical support.

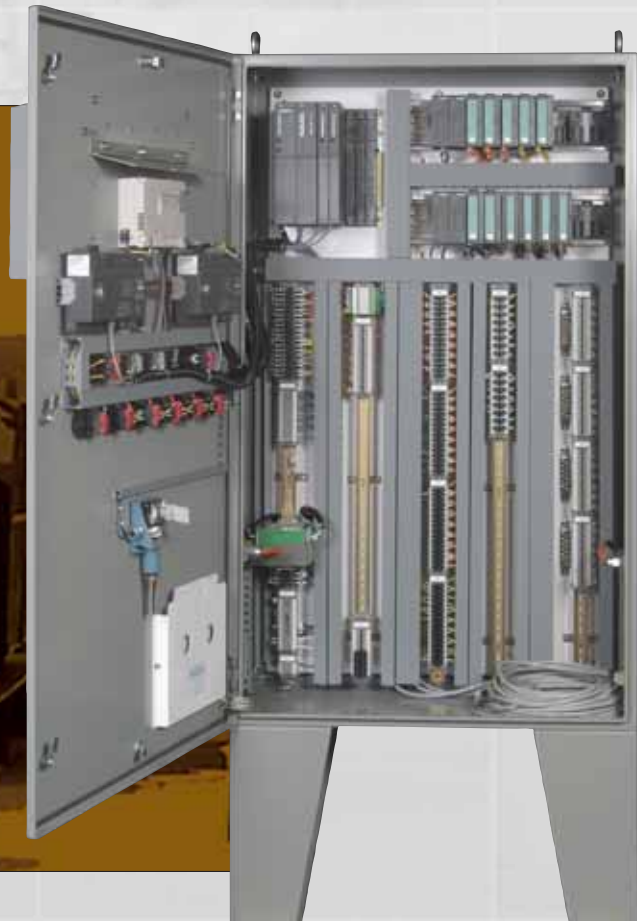

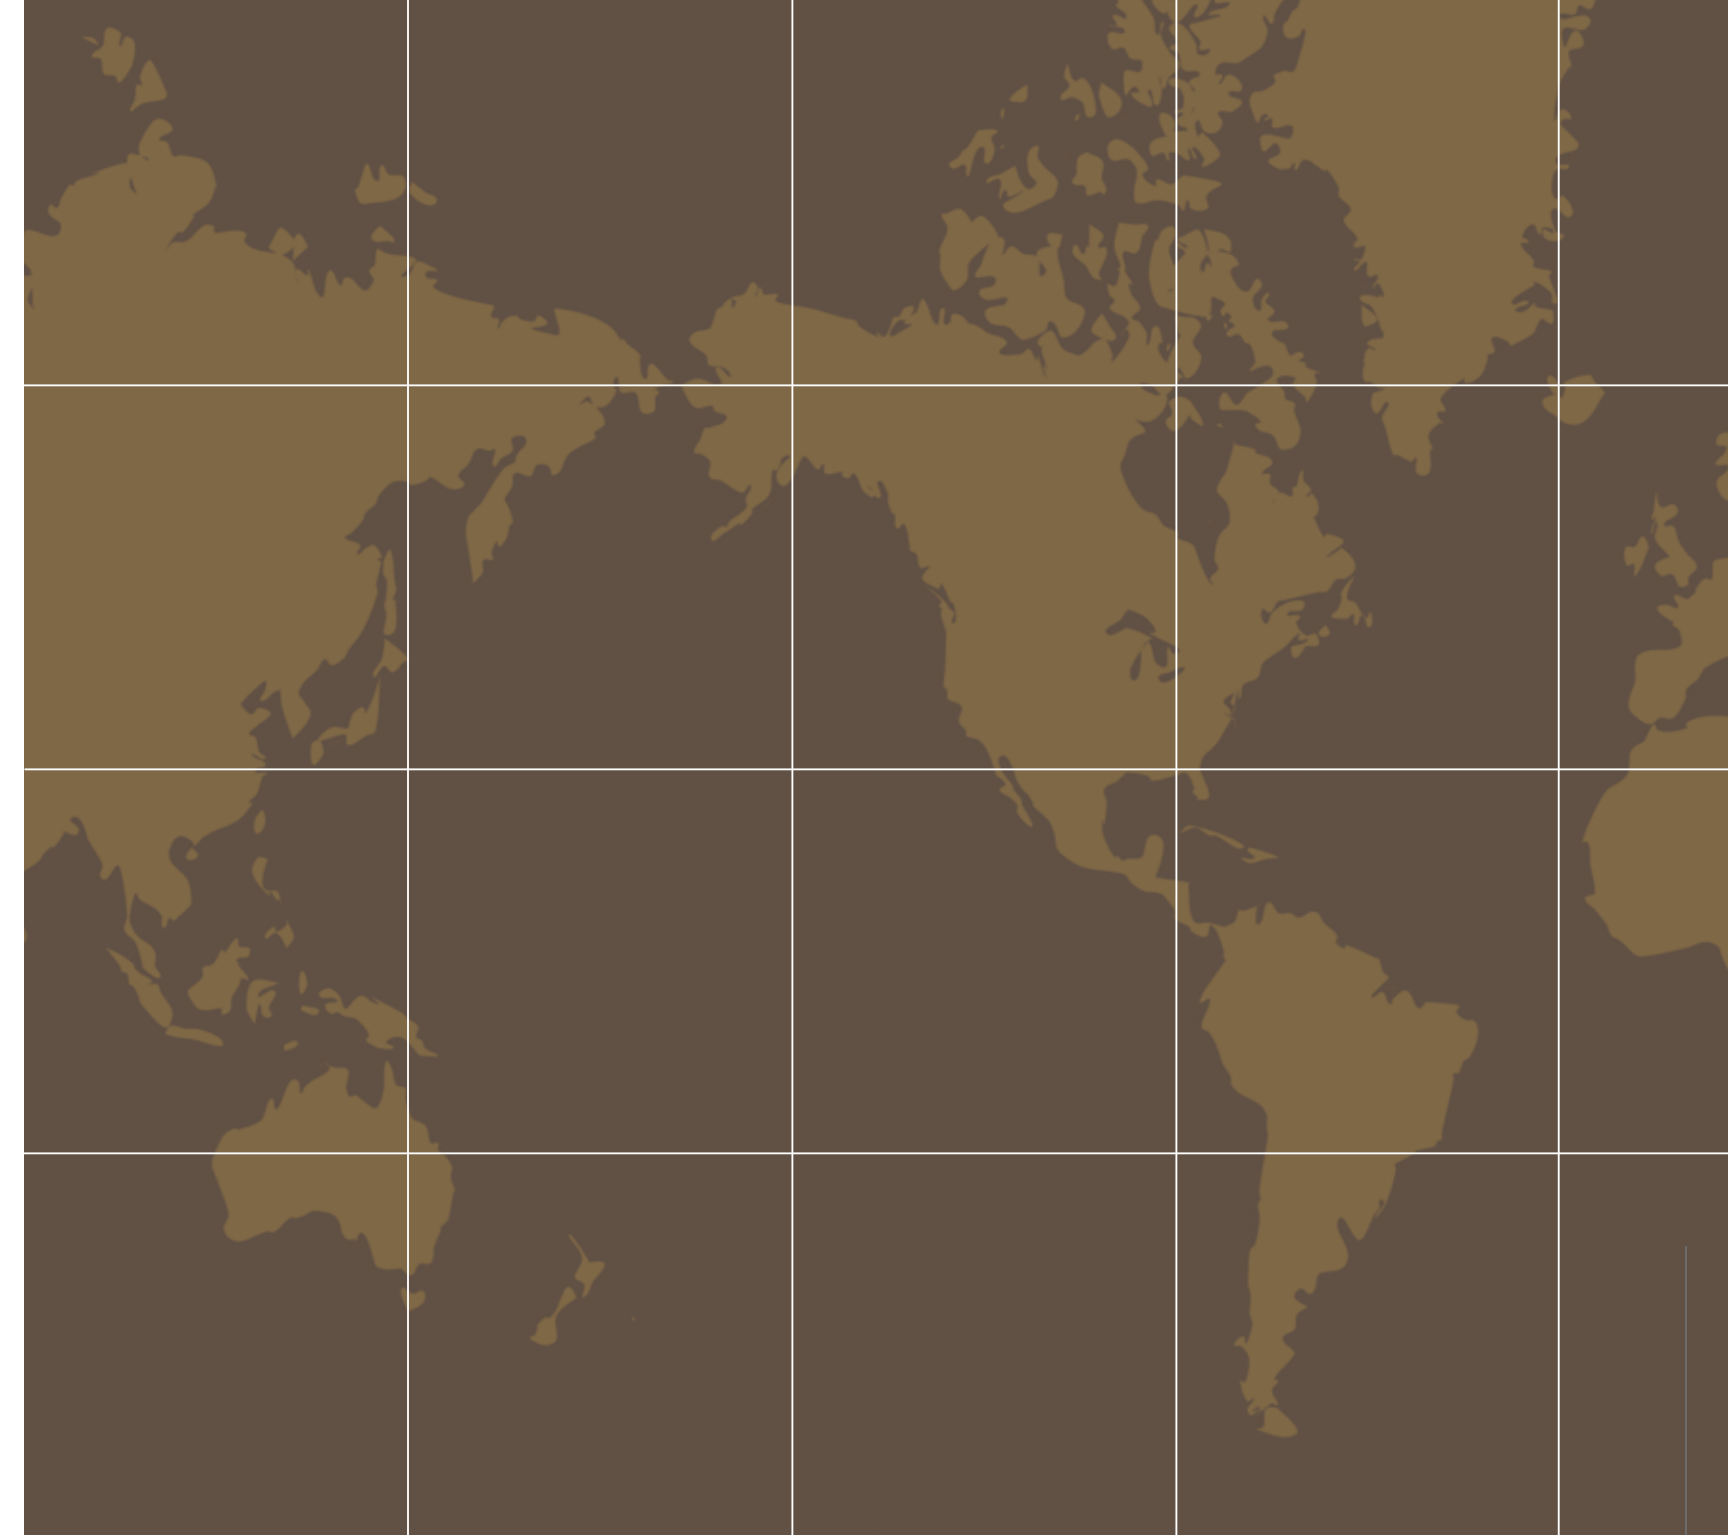

Customer-Focused Operation

Our 28,500-square foot facility exists for one purpose: to provide quality control systems. We use intelligent approaches, such as lean-manufacturing techniques, to enhance our productivity and free up time to devote to our customers.

We have in-house metal fabrication capabilities, including drilling, punching, cutting and bending. We can meet all your requirements from one single facility. We perform complete panel assembly, including wiring, control mounting, testing and packaging.

Worldwide Utilization & Support

You'll currently find Murphy panels in operation worldwide. Our solutions include:

- Annunciator Shutdown Panels
- Microprocessor-Based Systems
- PLC-Based Systems

What You Want, When You Need It

No two control projects are exactly the same, that's why at Control Systems and Services we've built our business one customer at a time, one panel at a time. We take you seriously, we take your needs seriously and we deliver solutions that perform time and again.

We pay attention to details and offer customer service that is unmatched in the oil and gas industry.

With more than 65 years of history, we have the experience to provide you with the correct solution for your control systems needs. We have the expertise to take your project from conception to completion and beyond, with 24-hour technical support.

Our services include:

- ♦ Project Management
- ♦ Design and Engineering
- ♦ Testing
